EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ted Rittmaster on 10 March 2008.

The application has been amended as follows: Claim 37 was indicated allowable if made independent in the last action, but upon further consideration the Examiner has noted that all sensors inherently have at least initialization and steady-state phases, thus making the claim rejectable. As such, in order to expedite allowance of the case, Claim 37 has been amended back to its previous dependent form to read:

The method of claim 34, wherein generating a calibration curve comprises generating a calibration curve representing a sensor having a plurality of phases.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the methods of claims 1-10, 12-20, and 34-43, including, *inter-alia*, adjusting a sensor calibration curve by compiling an array of data, generating a calibration curve, adjusting a nominal output current, and adjusting the calibration curve based on the nominal output current by

performing linear regression on the array of data, where the linear regression determines a first calibration point.

Iyengar (US Patent Application Publication 2005/0109637) discloses a method of adjusting a sensor's calibrating curve comprising compiling a calibration array of data values related to the sensor and generating a calibration curve (λ), adjusting a nominal sensor output current (I_{measured} ; paragraph [0054]) based on the calibration array, and adjusting the calibration curve based on the adjusted sensor output (paragraphs [0104], [0171]-[0177], [0182], [0186]), including performing linear regression on the calibration data (paragraph [0073]). Iyengar does not disclose the result of that linear regression being a calibration point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAREN E. TOTH whose telephone number is (571)272-6824. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor, II can be reached on 571-272-4730. The fax phone
